OPESHA Solutions Launches AI-Powered SME Credit Intelligence Platform at Singapore FinTech Festival 2025, Expands to South-East Asia

Singapore, 12 November 2025 – OPESHA Solutions, a leading fintech innovator focused on SME financial empowerment, announces the launch of its AI-powered SME Credit Intelligence Platform at the Singapore FinTech Festival 2025 (SFF 2025). This milestone marks a significant step in the company's mission to make fair and accessible credit available to underserved SMEs across Africa and now South-East Asia.

The platform leverages Agentic AI technology to provide SMEs with actionable insights into cash flow management, credit readiness, and access to appropriate financial products. By connecting businesses with banks, microfinance institutions, and private investors, OPESHA aims to simplify complex financial choices and reduce loan denial rates, unlocking growth opportunities for small businesses.

This launch coincides with OPESHA's strategic expansion into South-East Asian markets, beginning with Indonesia and the Philippines, strengthening cross-regional financial inclusion efforts.

"Having witnessed firsthand the challenges SMEs face in accessing financing, we built this platform to provide a smarter, fairer path to credit," said John Ndiritu Wangombe, Founder & CEO of OPESHA Solutions. "By combining AI-driven insights with real-world lender networks, we empower SMEs to make informed financial decisions and grow sustainably."

The platform also integrates OPESHA's collaboration with AWS and Mastercard's Agentic AI for SME Financial Empowerment initiative, underscoring its commitment to responsible AI deployment in financial services.

Dr. David Kabata, Chief Operating Officer at OPESHA Solutions, added: "Our vision is to create an inclusive digital economy where SMEs, regardless of size or location, can thrive. Launching at SFF 2025 allows us to showcase our solutions to global partners and investors, reinforcing our ambition to impact millions of SMEs globally."

OPESHA Solutions' launch will be highlighted during its presentation at the AI for Financial Inclusion Pavilion on 13 November 2025, 2:00 PM SGT. Media representatives attending SFF 2025 are invited to meet the OPESHA team for interviews and demonstrations.
