

## Press Release

FOR IMMEDIATE RELEASE

### **GAIT Global Unveils National-Level Reports Unlocking Sustainable Finance Opportunities in Tonga and Samoa**

GAIT Global, a leading climate asset management firm, is thrilled to announce the successful completion of two national-level reports commissioned by GAIT Global for the Kingdom of Tonga and the Government of Samoa. These comprehensive studies delve into the commercial readiness and feasibility of blue and green nature-based solution carbon projects in the picturesque Kingdom of Tonga and Samoa.

Tonga and Samoa, renowned for their natural beauty and commitment to sustainable development, have partnered with GAIT Global to evaluate the potential of blue and green nature-based solutions in the Pacific. These initiatives are not only aimed at carbon reduction but also at promoting environmental conservation and sustainable economic development.

Our team of experts has meticulously analyzed the opportunities and challenges associated with implementing these pioneering carbon projects in the region. The reports provide a thorough examination of feasibility and commercial viability, along with pragmatic recommendations to fully unlock the potential of these nature-based solutions. GAIT Global is excited to unveil these findings, providing an attractive investment opportunity for prospective carbon funders. This aligns perfectly with our core mission of advancing sustainability and making a positive impact on our planet. The study's results will serve as a valuable resource for the respective nations' leaders, businesses, and environmental stakeholders as they navigate the path towards a greener, more sustainable future.

As we continue our journey, GAIT Global remains committed to forging global partnerships and facilitating meaningful solutions for a more sustainable world. We eagerly anticipate ongoing collaboration with the Kingdom of Tonga and the Government of Samoa, as well as with other nations dedicated to a brighter, more environmentally friendly future. For further information on these reports or to discuss potential investment opportunities, please contact
